Summary of Qualifications

- ❖ I am currently pursuing my bachelor's degree in Computer Science.
- ❖ I have working knowledge of C++, Java, HTML, CSS, JavaScript, and MySQL.
- ❖ I have experience with Windows, UNIX, Linux, XCode and Android Studio.

Education

Cal State University, San Bernardino
Bachelor of Science: *Computer Science*
Anticipated graduation December 2017

San Bernardino, CA
Fall 2013 – Present

I am currently a full-time student with a cumulative GPA of 3.2. I have been on the Dean's list for two quarters and have been a member of CSUSB Association for Computer Machinery for two years. I

Cal State University, San Bernardino
Certificate in Computer Systems and Programming

San Bernardino, CA
July 2016

With this certificate, it shows that I am capable of programming in one or more computer languages.

Projects

Room Quest **Cal State University, San Bernardino** **Winter 2017**

- ❖ Room Quest is an IOS/Android application that helps visitors and new students navigate around campus. The program runs from Esri's ArcGis software and SDKs. My position throughout this project is a Software Engineer and I am part of coding the IOS application in Swift 3. I have started working on this project on January of 2017. The application can have the user search for a specific room and display the different level of layers for each building.

Employment History

Math Tutor **Cal State University, San Bernardino** **Summer 2016**

- ❖ This job required me to assist incoming freshmen who were unprepared for college math. To make sure my students understood the material, I would give them quizzes or a 1-hour test that are created by me. At the end of the program my class took a test to see if they were ready for college math. My class ended up with a 100% pass rate.

Grocer **Cardenas Markets** **May 2014 – January 2015**

- ❖ At Cardenas Markets, I stocked up shelves with merchandise and assisted customers with their demands. The job was difficult at first because of the language barrier with many customers, but as time passed I adapted by practicing Spanish on my own. It soon became effortless to communicate with customers. Later, management allowed me to work in multiple departments such as grocery and dairy.

Courses Completed and in Progress

- ❖ Software Engineering
- ❖ Data Structure in C++
- ❖ Web Page and Server Programming
- ❖ Machine Organization and Digital Logic
- ❖ Operating Systems
- ❖ Algorithm Analysis
